

Guardrail Systems (MHE / PIT)

A heavy duty steel guard system which separates Forklifts/ Equipment from pedestrian routes across in-dustrial buildings.

The system includes steel posts, typically spaced at 1925mm post centres, with 3No. Rails between.

Product Features

Supplied with all fittings and parts included that you need to create your guardrail system

Foam gaskets are included underneath the base rail to prevent dirt and debris collection

The system also benefits from de-stacker extensions, which allows the guardrail to stand at approx. 3000mm high.

Technical Details

1100mm high Guardrail

Includes steel posts, typically spaced at 1850mm post centres, with 3 No. Rails (2 No. Mid and 1 No. Base) in between

Pedestrian gates are also available to integrate into this guardrail system

Available in yellow as standard

Product Specification

Material	Mild Steel
Height	1100mm (Standard) 3100mm (With De-stacker)
Post Centres	1925mm (Standard)
Recycling Group	Mild Steel
Floor Anchors	4No. M10 x 140mm Safety Plus Anchors (Per Post) 4No. M16 Black Nylon Washer (Per Post)
Rail Fixings	2No. M12 x 30mm Button Head (Per Rail) 2No. M12 Nylon Washer (Per Rail) 2No. M12 Nut (Per Top & Mid Rail)
Baseplate Pad	Small ShockSAFE Pad
Colour/Finish	PPC RAL 1023 Yellow (Standard)
