

What type of racking do you have?

Racking can (and should) last for a long time. People also tend to move companies, taking with them their racking knowledge. Because of this, we're often asked to help identify different types of racking. We've put together this handy cheat sheet to help you spot which type you have in your warehouse. Included is a Rack Armour® size guide to help show the best fit.

Type	Front	Cross-Section	Size Guide		Rack Armour
APEX			Front Face	80mm	 EURO A
			Side Profile	36mm	
			Width	66mm	
BITO CARTON LIVE			Front Face	90mm	 EURO B
			Side Profile	44mm	
			Width	75mm

About Rack Armour®

Rack Armour® has been the world's best-selling plastic upright protector for over 19 years and is shown per install, to save tens of thousands of pounds reduction in damage repair costs.

Benefits

- 800% proven ROI
- Slash maintenance budgets and workloads
- Self-install with no fixings & for all racking types
- Zero maintenance & floor damage
- A single solution for all warehouse environments

Made from ballistics grade plastic, the Rack Armour® outer shell is shaped to divert impact energy around the rack leg instead of through it. Any remaining impact energy is absorbed by the interior foam until it is diffused. This twin action protection uniquely helps to maintain the structural integrity of the racking system.
