

ImpactSAFE Bollard

Brandsafe® Impact Protection

Features and Benefits

- Bolt Down Bollards with built in shock absorption to cushion impact forces from wrenching floor anchors and protect concrete slabs from cracking under heavy impacts from MHE
- Benefits from removable Polymer cover kits
- Available in 5 standard colour options that are ideal for high impact risk areas
- Includes shock absorbing rubber buffers to arrest impact force
- Tested to PAS 13 Approved by TÜV Nord

Material Specification

Bollards

1000mm, 1300mm and 1600mm height options

Includes polymer bollard cover kit and 4 No. safety-plus floor anchors

168mm diameter steel core and galvanised base plate

Includes 50mm reflective band for maximum visibility

Property	Specification
Material	Mild Steel/High Density Polyethylene (HDPE)/Rubber
Height	1000mm, 1300mm or 1600mm
Base	290mm x 342mm
Diameter	210mm
Steel core finish	Hot Dip Galvanised (HDG) BS EN ISO 1461
Fixing holes	20mm Diameter
Floor anchors	Hilti HSA4
Tested Impact Energy (J)	6,100*
Deflection (mm)	200

*Based on impact 90°
