

Single Bumper Barrier

Brandsafe® Impact Protection

Features and Benefits

- Low level bumper barriers manufactured from a flexible HDPE polymer with a foam diffuser
- Deflects under impact without damaging
- Quick and easy installation - all fixings provided
- Available with single or double bumper barrier
- High visibility colour clearly gives safe working boundaries for MHE drivers
- Tested to PAS 13 Approved by TÜV Nord

Material Specification

Barriers

Low maintenance High Density Polyethylene (HDPE) plastic barriers only need replacing when frequent, major impact has occurred.

Unlike metal barriers, there is minimal floor damage when impact occurs, saving maintenance costs long term.

Available in a striking, high visibility colour that is easily detectable, preventing accidents before they happen.

Fully recyclable and non-toxic. Suitable for use in food production facilities and freezer environments.

Property	Specification
Material	High density polyethylene (HDPE)
Height	370mm
Width	300mm (footplate)
Length	1400mm upwards
Temperature range	Use in ambient, chilled and freezer environments
Colour options	Safety Yellow and Grey
Floor anchors	Hilti HSA4
Barrier option	Single
Tested Impact Energy (J)	11,000*
Deflection (mm)	234

*Based on impact 90°
