

racksack® rollcage

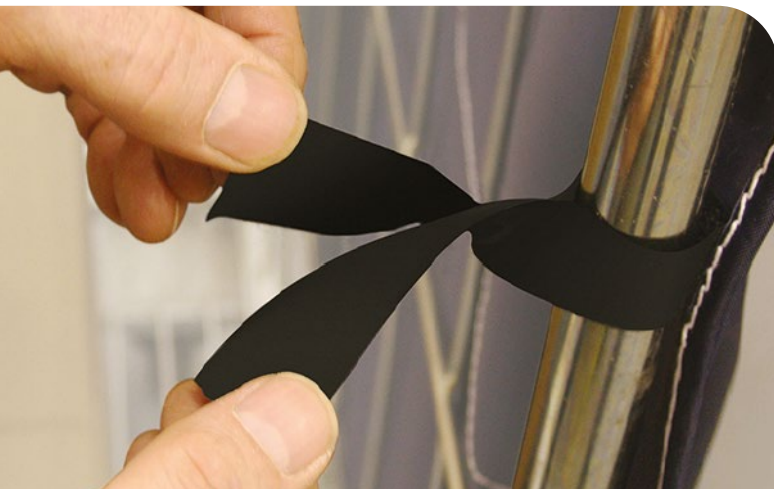

Waste Segregation Sack

racksack® rollcage is perfect for use on 800mm wide roll containers. It allows your team to collect and segregate waste packaging materials on the go. A large-capacity double-pocketed recycling sack that when hung, has an open 'frog mouth' to easily receive waste, allowing you to segregate waste on the move. Three strong handles are woven into the edge of the sack, one on each side for carrying and one on the base, so it can be easily tilted and emptied once full.

Features and Benefits

- Segregate waste packaging materials as you go.
- Ideal for 800mm wide roll containers.
- Can be overprinted for volume orders.
