

racksack® trolley

Waste Segregation Sack

Keep waste materials off the floor and segregate them as you go. **racksack® trolley** is a single or double-pocketed recycling sack that fits onto the handles of picking trolleys up to 580 mm. When hung, it has an open 'frog mouth' to easily receive waste, allowing you to segregate waste on the move. Two strong handles are woven into the edge of the sack, so it can be easily carried and emptied at your main waste station once full.

Features and Benefits

- Segregate waste materials as you go, keeping packaging off the floor.
- Designed for use on 580 mm wide trolleys.
- Single or double-pocket versions available.
- Can be overprinted for volume orders.
- Single pocket size: 600 mm (H) x 600 mm (W).
- Single pocket capacity: 50 litres.
- Double pocket size: upper pocket 600 mm (H) x 600 mm (W), lower pocket 500 mm (H) x 600 mm (W).
- Double pocket capacity: inner pocket 50 litres, outer pocket 55 litres, combined capacity when used together 73 litres.
- Overall size: 750 mm (H) x 600 mm (W).
