

Brandsafe

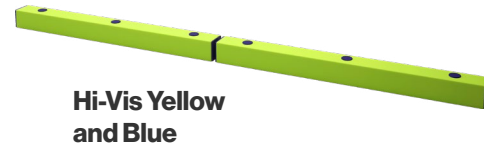

Floor Rail Bumper

These **floor rail bumpers** are ideal for providing subtle protection at low levels from order pickers, with minimal space intrusion in the warehouse. Manufactured from high-density polyethylene (HDPE) and fixed to the floor, these bumpers are strong and durable enough to take knocks and bumps from MHE drivers. They are ideal for placing behind bays to prevent pallets from being hit against walls or racking.

Features and Benefits

- Manufactured High-Density Polyethylene (HDPE).
- Unlike metal bumpers, there is minimal floor damage when impact occurs.
- Provides subtle protection at low-levels.
- Quick and easy installation - all fixings provided.
- Materials are non-toxic and fully recyclable.
- Suitable for use in food production facilities and freezer environments.
- High visibility colour clearly highlights safe pedestrian areas.
- Can be used in combination with other barriers for extra protection.

Material	High density polyethylene (HDPE)
Properties	Fully recyclable and non-toxic
Temperature range	Use in ambient, chilled and freezer environments
Height	100mm
Width	100mm
Length	1200mm
Colour options	Hi-Vis Yellow and Blue / Safety Yellow / Grey
